

Unified Layout System

title / title-and-content / content

1. Title + Body (2 slots)

This layout uses `title-and-content` with **2 slots**.

- Slot 1: Title (Auto-positioned at top)
- Slot 2: Body (Full width content area)

The engine detects 2 slots and picks the Standard variation.

2. Title + 2 Columns (3 slots)

Left Column

This uses the same `title-and-content` ID.

But because we provided **3 slots**, the engine picks the 2-Column variation.

Right Column

Dynamic resolution simplifies the user experience.

3. Title + 4 Cards (5 slots)

1

Detected 5 slots (Title + 4).

2

Resolves to Grid 2x2.

3

Automatic layout.

4

Consistent ID.

03. Card Alignment Only (1 slot)

This uses `content` layout with **1 slot**.

Full page canvas for impactful statements.

5. Content Columns (2 slots)

Left side content.

Right

6. Grid 2x2 (4 slots)

Content layout with 4 slots.

Text + Gallery

Description

This layout mixes text (Slot 1) with images (Slots 2-4).

The engine treats them all as slots in a flexible grid.
